Company Profile

Company Profile

LUCKY XFC

Shenzhen Xin Fei Chi Technology Co., Ltd. With **13 years** of focus on the field of high-quality touch screen displays, all-in-one machines and curved touch screens. Integrating R&D, production and sales, the company relies on the etcore technology system to provide full-process services from design, sampling to mass production. Its products cover sizes ranging from **2.5 inches to 120 inches**, support a minimum order quantity of **1** unit, and offer **OEM, ODM** and **LOGO** customization services, serving as a one-stop solution provider.

The factory covers an area of **3,100** square meters, with a team of over **160** employees equipped with imported equipment. **100%** inspection is implemented throughout the entire process to ensure product quality, and worry-free after-sales service is provided. The core products boast advantages including ultra-clear **4K** display, **99%** operation guarantee for game consoles, **144Hz** high refresh rate and zero touch delay, with color deviation **< 3%** and no image distortion.

13YEARS OF FOCUS ON INDUSTRIAL TOUCH SCREEN DISPLAY MANUFACTURERS

- ✓ Creative science and technology
- ✓ Going green and environmental protection
- ✓ Excellent quality
- ✓ Intimate service

Product Advantages

LUCKY XFC

Ultra-clear 4K Display

Ensures 99% operating time of game consoles (referring to the proportion of fault-free operation time), providing continuous support for a stable gaming experience.

144Hz High Refresh Rate

Significantly enhances the smoothness of game visuals, reduces motion blur, and delivers a more fluid visual feedback.

SZero Touch Delay

Features fast touch response without lag, with operational commands taking effect instantly, allowing players to enjoy worry-free game control.

M99% Game Console Operation Guarantee

Resists light spot interference and color deviation, with color deviation controlled within <3%. The images are free from distortion, presenting realistic and clear visual effects.

Our Strength

LUCKY XFC

01.DIRECT FACTORY

13 years of focus on high-quality touchscreen monitors, equipped with **multiple sets of** imported equipment, and **100%** inspection throughout the entire process to ensure quality.

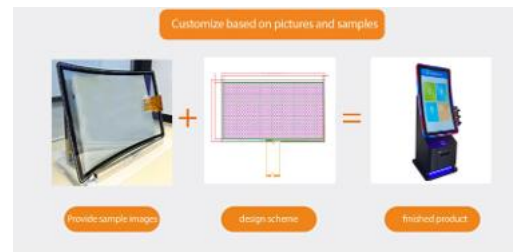

04.PROFESSIONAL TEAM

The company has a production team of **160** people and utilizes multiple sets of imported automated equipment for production.

02.APPLICATION FIELDS

The products are widely applied in the customization of industrial control touch **all-in-one** machines, such as those used for game consoles, advertising machines, POS machines, and inquiry machines.

05.CUSTOMIZATION SERVICE

The products cover sizes from **2.5** inches to **120** inches, and support a minimum order quantity of **1** unit as well as **OEM**, **ODM** and **LOGO** customization.

03.STRICT QC SYSTEM

100% inspection throughout the entire process ensures quality, featuring **4K** ultra-high definition, 99% game console operation guarantee, **144Hz** high refresh rate, zero touch latency, and more.

06.INDEPENDENT R&D

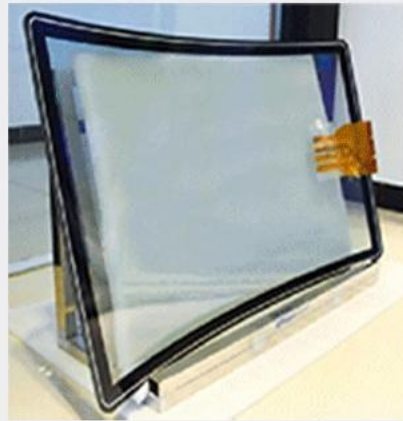

The company integrates independent **R&D**, production and sales, and provides **end-to-end** services ranging from design, prototyping, inspection to mass production.

Flat Touch Display

It adopts a human-sensing touch design, which responds with just a light fingertip touch.

Flat Touch Display

It adopts a human-sensing touch design, which responds with just a light fingertip touch.

J-Type Curved Touch Screen (43-inch, 49-inch, 55-inch J-Type Curved)

The curved side of the **J-type** curved screen is ergonomically designed — when users touch the curved side, their wrists do not need to bend deliberately and can naturally fit the curved trajectory, reducing muscle fatigue from long-term operation. For example, with the **J-type** curved cash register screen in 24-hour convenience stores, cashiers frequently touch the curved side to complete checkout.

C-Type Curved Touch Screen (32-inch, 43-inch, 49-inch, 55-inch C-Type Curved)

It supports mainstream operating systems such as Windows, Android, and Linux, with plug-and-play touch drivers. It comes standard with **HDMI**, **USB**, and **RJ45** Ethernet ports; some models support **RS232** (for industrial control) and **4G modules** (for wireless transmission), and can connect to devices like industrial computers, cameras, and barcode scanners.

Flat Touch Display

(Capacitive Touch, 16:9 Aspect Ratio,
1920×1080 Resolution, Metal Housing)

It supports customized expansion via rich interfaces, features low overall power consumption, and can withstand a wide temperature range of **-10°C to 60°C** (enabling **24/7** stable operation) as well as static electricity. The device is compatible with various ecosystems, supporting customized industry-specific systems such as **Android, Windows, and Linux**. Equipped with an efficient heat dissipation system, it operates continuously without lag; the all-aluminum rear cover with multiple air vents is designed to facilitate faster and more efficient heat dissipation.
